

Bertocchi Smallgoods - Code Of Pork Procurement

November 2019

Bertocchi Smallgoods is fully accredited, complies with all regulatory industry bodies and meets Australian and world class quality ISO 9001:2015, HACCP and SQF standards.

Bertocchi Smallgoods fully supports cruelty-free farming of pigs and all other animals, and sources all such available selected and suitable local pork, Australia wide, in order to support the Australian pork industry and the local pig farmers.

With demand exceeding the amount of available domestic Australian Pork, Bertocchi supplements its requirements with imported pork from Australian Government-approved suppliers from Europe, the USA and Canada. However, Bertocchi still offers numerous products made exclusively from Australian pork. For example, all Bertocchi salami products and bone-in hams are made using only Australian pork.

Bertocchi makes some products using pork that is *Outdoor Bred (Raised Indoors on Straw)*. This should be indicated on the product labelling. For more information on the pork used in a particular product, please call (03) 9355 5100 or email qa@bertocchi.com.au

In response to consumer and market demands, Bertocchi has also developed a range of organic smallgoods, which is currently available on a made-to-order basis. This range is known as Happy Pig and is NASAA Certified (NASAA being the National Association for Sustainable Agriculture, Australia).

Bertocchi is a proudly 100% Australian owned and operated company, employing over 500 Australian workers.
